

Program

WRIST ARTHROSCOPY COURSE

Training on Anatomical Specimen

Basic and Intermediate Course - Taiwan

May 30th to 31st, 2020

Organized by EWAS

With the support of:

FESSH, Honk-Kong Society for Surgery of the Hand, CUHK Depart. of Orthopaedics and Traumatology

Course Supervisor:

C. MATHOULIN (France)

Course Directors:

T. NAKAMURA (Japan)

J.R. HAUGSTVEDT (Norway)

W.J. CHEN (Taiwan)

Faculty:

Y. ABE (Japan)

T. EGI (Japan)

K. FUJIO (Japan)

Y.K.LEE (Korea)

P.C. HO (Hong-Kong SAR, China)

J. KOO (Hong-Kong SAR, China)

J.P. WANG (Taiwan)

C.H. WU (Taiwan)

M. LEVADOUX (France)

J.M. COGNET (France)

Y.C. CHIU (Taiwan)

Y.C. HUANG (Taiwan)

J.T. SHIH (Taiwan)

M. TATEBE (Japan)

W.L. TSE (Hong-Kong SAR, China)

Morning

08:15	Lecture 1	Moderator : T. Nakamura
<p>Lecture 1 Basic of wrist arthroscopy</p> <ul style="list-style-type: none"> · How to perform wrist arthroscopy : instruments, installation and portal (15 min) · Complications of wrist arthroscopy (15 min) · Arthroscopic ganglionectomy (10 min) · Arthroscopic synovectomy (10 min) · Radial styloidectomy (10 min) 		<p>W.J. Chen</p> <p>Y.C. Huang</p> <p>Y.C. Chiu</p> <p>Y.K. Lee</p> <p>J.P. Wang</p>
<p>9:15 – 12:30 Practical session 1</p> <p>Radiocarpal and midcarpal joints examination Removal of synovial cyst Radial styloidectomy</p>		
<p>Experts help students directly at their allocated tables or an anatomical specimen with simultaneous teaching, individual practical training by students (1 expert for 2 operating tables)</p>		<p>All experts</p>

Afternoon

14:00	Lecture 2	Moderator: PC Ho
<p>Lecture 2 SL and DRF</p> <ul style="list-style-type: none"> · Scapholunate ligament tears: problems and principles (15 min) · Arthroscopic scaphoid fracture treatment (15 min) · Arthroscopic scaphoid non-union (15 min) · Intraarticular radius fracture: arthroscopic reduction and fixation (15 min) 		<p>M. Levadoux</p> <p>J.M. Cognet</p> <p>W.L. Tse</p> <p>Y. Abe</p>
<p>15:00 – 17:30 Practical session 2</p> <p>Basic: Scapholunate tears Intermediate: scaphoid fracture (arthroscopic or open), intraarticular distal radius fracture</p>		
<p>Experts help students directly at their allocated tables on an anatomical specimen with simultaneous teaching Individual practical training by students (1 expert for 2 operating tables)</p>		<p>All experts</p>

17:00 End of the course—Course Banquet

Morning

08:30	Lecture 3	Moderator : JR Haugstvedt
Lecture 3: TFCC problems <ul style="list-style-type: none"> Principles of TFCC repair (15 min) TFCC peripheral tears : diagnosis and repair (15 min) TFCC inside-out foveal repair (15 min) Ulnocarpal abutment syndrome and arthroscopic Wafer procedure (15 min) Ulnar shortening and its arthroscopic findings (15 min) 		T. Nakamura J.R. Haugstvedt K. Fujio T. Egi M. Tatebe
9:45 -12:30 Practical session 3 Basic: TFCC peripheral repair and arthroscopic Wafer procedure Intermediate: DRUJ arthroscopy, TFCC foveal repair		
Experts help students directly at their allocated tables on an anatomical specimen with simultaneous teaching, individual practical training by students (1 expert for 2 operating tables) Students can be separated into basic and intermediate, according to their ability of wrist arthroscopy		All experts

Afternoon

14:00	Lecture 4	Moderator: WJ Chen
Lecture 4: Advanced arthroscopic procedures <ul style="list-style-type: none"> Thumb CMC arthroscopy (15min) Arthroscopic treatment of STT joint (15 min) Arthroscopic SL reconstruction (15 min) 		J. T. Shih J. Koo P.C. Ho
14:45 – 17:00 Practical session 4 Basic: Thumb CMC arthroscopy Intermediate: Arthroscopic SL reconstruction		
Experts help students directly at their allocated tables on an anatomical specimen with simultaneous teaching, Individual practical training by students (1 expert for 2 operating tables) Students can be separated into basic and intermediate, according to their ability of wrist arthroscopy		All experts

17:00 End of the course
