OBJECTIVES

- To review current international guidelines and indications for endocrine radiofrequency ablation.
- To understand patient selection, pre-procedural evaluation, and ultrasound-based risk stratification.
- To demonstrate the technical principles and procedural steps of ultrasound-guided endocrine RFA.
- To recognize potential complications and strategies for prevention and management.
- To evaluate clinical outcomes, long-term efficacy, and the role of RFA within multidisciplinary thyroid care.

EDUCATIONAL METHODS

- The course will include a combination of theoretical teaching, case-based discussions, and practical hands-on training.
- Interactive lectures covering indications, guidelines, and procedural techniques
- Live or recorded procedural demonstrations of ultrasound-guided thyroid RFA
- Case-based multidisciplinary discussions involving surgeons, radiologists, and endocrinologists

-  Hands-on training sessions using ultrasound simulators or tissue models to practice needle positioning and ablation techniques
-  Expert panel discussions addressing real-world clinical scenarios and complication management

TARGET AUDIENCE

-  This course is designed for physicians and specialists involved in the diagnosis and treatment of thyroid diseases, including:
-  General Surgeons
-  Endocrine Surgeons
-  Otolaryngologists (ENT Surgeons)
-  Radiologists / Interventional Radiologists
-  Endocrinologists and Metabolism Specialists
-  Physicians involved in thyroid imaging and minimally invasive therapies

INVITED INTERNATIONAL FACULTY
